

Please Remember to Water Your Trees!

The recently-planted tree(s) in your boulevard will need some extra TLC, and your community needs your help.

- Please make sure all newly planted trees get enough water each week to reach the roots *including those trees with water bags.*
- It's important the delicate roots do not dry out in the first critical years.
- A 4" layer of mulch keeps the soil and roots cool and helps retain moisture. *Keep mulch away from trunk!*

New Tree Planting Detail

Missoula Parks & Recreation 2019

- Direct water at the drip line and away from trunks to encourage their roots to grow outward.
- Use your water efficiently and effectively.*
